SIEMENS

Data sheet

6GK7542-1AX00-0XE0

product type designation

CM 1542-1

communications module CM 1542-1 for connection of S7-1500 to PROFINET as IO Controller or IO Device: TCP/IP, ISO-on-TCP, UDP, S7 communication, IP broadcast multicast, SNMPV1, time-of-day synchronization via NTP, 2xRJ45 (10/100 Mbit).

transfer rate		
transfer rate		
• at the 1st interface	10 100 Mbit/s	
interfaces		
number of interfaces / according to Industrial Ethernet	1	
number of electrical connections		
at the 1st interface / according to Industrial Ethernet	2	
type of electrical connection		
at the 1st interface / according to Industrial Ethernet	RJ45 port	
supply voltage, current consumption, power loss		
type of voltage / of the supply voltage	DC	
supply voltage / 1 / from backplane bus	15 V	
relative symmetrical tolerance / at DC		
• at 15 V	3 %	
consumed current		
• from backplane bus / at DC / at 15 V / typical	0.22 A	
power loss [W]	3.3 W	
ambient conditions		
ambient temperature		
 for vertical installation / during operation 	0 40 °C	
 for horizontally arranged busbars / during operation 	0 60 °C	
during storage	-40 +70 °C	
during transport	-40 +70 °C	
relative humidity		
 at 25 °C / without condensation / during operation / maximum 	95 %	
protection class IP	IP20	
design, dimensions and weights		
module format	Compact module S7-1500 single width	
width	35 mm	
height	142 mm	
depth	129 mm	
net weight	0.4 kg	
fastening method		
S7-1500 rail mounting	Yes	
product features, product functions, product components / general		
number of units		
• per CPU / maximum	8	
• note	depending on CPU type	

performance data / open communication	
number of possible connections / for open communication	
by means of T blocks / maximum	64; depending on the system upper limit
data volume	. , . ,
as user data per ISO on TCP connection / for open communication / by means of T blocks / maximum	65536 byte
number of Multicast stations	6
performance data / S7 communication	
number of possible connections / for S7 communication	
• maximum	64; depending on the system upper limit
performance data / multi-protocol mode	
number of active connections / with multi-protocol mode	64
performance data / PROFINET communication / as PN IO control	ller
product function / PROFINET IO controller	Yes
number of PN IO devices / on PROFINET IO controller / operable / total	128
number of PN IO IRT devices / on PROFINET IO controller / operable	64
number of external PN IO lines / with PROFINET / per rack	10
data volume	
 as user data for input variables / as PROFINET IO controller / maximum 	8 Kibyte
 as user data for output variables / as PROFINET IO controller / maximum 	8 Kibyte
 as user data for input variables per PN IO device / as PROFINET IO controller / maximum 	1433 byte
 as user data for output variables per PN IO device / as PROFINET IO controller / maximum 	1433 byte
 as user data for input variables per PN IO device / for each sub-module as PROFINET IO controller / maximum 	256 byte
 as user data for output variables per PN IO device / for each sub-module as PROFINET IO controller / maximum 	256 byte
performance data / PROFINET communication / as PN IO device	
product function / PROFINET IO device	Yes
product function / PROFINET IO device data volume	Yes
·	Yes 8192 byte
data volume • as user data for input variables / as PROFINET IO device	
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO	8192 byte
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as	8192 byte 8192 byte
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as	8192 byte 8192 byte 256 byte
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-	8192 byte 8192 byte 256 byte 256 byte
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module	8192 byte 8192 byte 256 byte 256 byte 256 byte
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported	8192 byte 8192 byte 256 byte 256 byte 256 byte
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol	8192 byte 8192 byte 256 byte 256 byte 256 byte
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported	8192 byte 8192 byte 256 byte 256 byte 256 byte 32
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP	8192 byte 8192 byte 256 byte 256 byte 256 byte 32
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering product function / MIB support	8192 byte 8192 byte 256 byte 256 byte 256 byte 32 Yes
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering product function / MIB support protocol / is supported • SNMP v1	8192 byte 8192 byte 256 byte 256 byte 256 byte 32 Yes
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering product function / MIB support	8192 byte 8192 byte 256 byte 256 byte 256 byte 32 Yes
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering protocol / is supported • SNMP v1 • DCP • LLDP	8192 byte 8192 byte 256 byte 256 byte 256 byte 32 Yes Yes
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering protocol / is supported • SNMP v1 • DCP • LLDP configuration software	8192 byte 8192 byte 256 byte 256 byte 256 byte 32 Yes Yes Yes Yes Yes Yes
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering product function / MIB support protocol / is supported • SNMP v1 • DCP • LLDP configuration software • required	8192 byte 8192 byte 256 byte 256 byte 256 byte 32 Yes Yes Yes
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering product function / MIB support protocol / is supported • SNMP v1 • DCP • LLDP configuration software • required identification & maintenance function	8192 byte 8192 byte 256 byte 256 byte 256 byte 32 Yes Yes Yes Yes Yes Yes Yes Ye
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering protocol / is supported • SNMP v1 • DCP • LLDP configuration software • required identification & maintenance function • I&M0 - device-specific information	8192 byte 8192 byte 256 byte 256 byte 256 byte 32 Yes Yes Yes Yes Yes Yes Yes Ye
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering product function / MIB support protocol / is supported • SNMP v1 • DCP • LLDP configuration software • required identification & maintenance function • I&M0 - device-specific information • I&M1 - higher level designation/location designation	8192 byte 8192 byte 256 byte 256 byte 256 byte 32 Yes Yes Yes Yes Yes Yes Yes Ye
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering protocol / is supported • SNMP v1 • DCP • LLDP configuration software • required identification & maintenance function • I&M0 - device-specific information	8192 byte 8192 byte 256 byte 256 byte 256 byte 32 Yes Yes Yes Yes Yes Yes Yes Ye
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering product function / MIB support protocol / is supported • SNMP v1 • DCP • LLDP configuration software • required identification & maintenance function • I&M0 - device-specific information • I&M1 - higher level designation/location designation product functions / diagnostics product function / web-based diagnostics	8192 byte 8192 byte 256 byte 256 byte 256 byte 32 Yes Yes Yes Yes Yes Yes Yes Ye
data volume • as user data for input variables / as PROFINET IO device / maximum • as user data for output variables / as PROFINET IO device / maximum • as user data for input variables / for each sub-module as PROFINET IO device • as user data for output variables / for each sub-module as PROFINET IO device • as user data for the consistency area for each sub-module number of submodules / per PROFINET IO-Device performance data / telecontrol protocol / is supported • TCP/IP product functions / management, configuration, engineering product function / MIB support protocol / is supported • SNMP v1 • DCP • LLDP configuration software • required identification & maintenance function • I&M0 - device-specific information • I&M1 - higher level designation/location designation product functions / diagnostics	8192 byte 8192 byte 256 byte 256 byte 32 Yes Yes Yes Yes Yes Yes Yes Ye

product function	
 switch-managed 	No
with IRT / PROFINET IO switch	Yes
configuration with STEP 7	Yes
product functions / routing	
service / routing / note	IP routing up to 1 Mbps
product function	
static IP routing	Yes
static IP routing IPv6	No
dynamic IP routing	No
dynamic IP routing IPv6	No
protocol / is supported	
• RIP v1	No
• RIPv2	No
RIPnG for IPv6	No
• OSPFv2	No
OSPFv3 for IPv6	No
• VRRP	No
VRRP for IPv6	No
• BGP	No
• PPP	No
PPoE via DSL	No
product functions / redundancy	110
product function	
·	Voc
ring redundancy redundancy manager	Yes
redundancy manager The self-like symmetric of AMPR. The self-like symmetric of AMPR. The self-like symmetric of AMPR. The self-like symmetric of AMPR.	Yes
protocol / is supported / Media Redundancy Protocol (MRP)	Yes
product functions / security	
product function	
 switch-off of non-required services 	Yes
 blocking of communication via physical ports 	No
log file for unauthorized access	No
product functions / time	
product function / SICLOCK support	Yes
product function / pass on time synchronization	Yes
protocol / is supported	
• NTP	Yes
standards, specifications, approvals	
reference code	
 according to IEC 81346-2:2019 	KEC
standards, specifications, approvals / Environmental Product	Declaration
Environmental Product Declaration	Yes
Global Warming Potential [CO2 eq]	
• total	124.91 kg
during manufacturing	21.24 kg
during operation	103.32 kg
after end of life	0.35 kg

security information	Ciamana pravides praducts and a little and the litt
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible

for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)

Approvals / Certificates
