SIMATIC PS307/1AC/24VDC/2A

SIMATIC S7-300 Regulated power supply PS307 input: 120/230 V AC, output: 24 V DC/2 A

input	
type of the power supply network	1-phase AC
supply voltage at AC	Automatic range selection
supply voltage	120 V/230 V
input voltage 1 at AC	85 132 V
input voltage 2 at AC	170 264 V
wide range input	No
overvoltage overload capability	2.3 × Vin rated, 1.3 ms
buffering time for rated value of the output current in the event of power failure minimum	20 ms
operating condition of the mains buffering	at Vin = 93/187 V
line frequency	50/60 Hz
line frequency	47 63 Hz
input current	
 at rated input voltage 120 V 	0.9 A
 at rated input voltage 230 V 	0.5 A
current limitation of inrush current at 25 °C maximum	22 A
duration of inrush current limiting at 25 °C	
• maximum	3 ms
l2t value maximum	1 A ² ·s
fuse protection type	T 1.6 A/250 V (not accessible)
fuse protection type in the feeder	Recommended miniature circuit breaker: 3 A characteristic C
output	
voltage curve at output	Controlled, isolated DC voltage
output voltage at DC rated value	24 V
output voltage	
 at output 1 at DC rated value 	24 V
output voltage adjustable	No; -
relative overall tolerance of the voltage	3 %
relative control precision of the output voltage	
 on slow fluctuation of input voltage 	0.1 %
 on slow fluctuation of ohm loading 	0.2 %
residual ripple	
• maximum	50 mV
typical	5 mV
voltage peak	
• maximum	150 mV
typical	20 mV
display version for normal operation	Green LED for 24 V OK
behavior of the output voltage when switching on	No overshoot of Vout (soft start)

response delay maximum	2 s
voltage increase time of the output voltage	
• typical	10 ms
output current	
rated value	2 A
• rated range	0 2 A
supplied active power typical	48 W
short-term overload current	
on short-circuiting during the start-up typical	9 A
at short-circuit during during the start up typical	9 A
duration of overloading capability for excess current	
on short-circuiting during the start-up	90 ms
at short-circuit during operation	90 ms
bridging of equipment	Yes
number of parallel-switched equipment resources for increasing	2
the power	-
efficiency	
efficiency in percent	84 %
power loss [W]	
 at rated output voltage for rated value of the output 	9 W
current typical	
closed-loop control	
relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical	0.1 %
relative control precision of the output voltage load step of resistive load 50/100/50 % typical	0.8 %
setting time	
 load step 50 to 100% typical 	0.5 ms
 load step 100 to 50% typical 	0.5 ms
setting time	
• maximum	1 ms
protection and monitoring	
protection and monitoring design of the overvoltage protection	Additional control loop, shutdown at < 28.8 V, automatic restart
	Additional control loop, shutdown at < 28.8 V, automatic restart Yes
design of the overvoltage protection	
design of the overvoltage protection property of the output short-circuit proof	Yes
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection	Yes Electronic shutdown, automatic restart
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation	Yes Electronic shutdown, automatic restart
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value	Yes Electronic shutdown, automatic restart 2.2 2.6 A
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum	Yes Electronic shutdown, automatic restart 2.2 2.6 A
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference • for mains harmonics limitation	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B not applicable
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B not applicable
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B not applicable
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability • CE marking	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2 Yes
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability • CE marking • UL approval	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 142), File E143289
design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection response value current limitation enduring short circuit current RMS value • maximum safety galvanic isolation between input and output galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum • typical protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability • CE marking • UL approval • CSA approval	Yes Electronic shutdown, automatic restart 2.2 2.6 A 2 A Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA 0.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2 Yes

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
